# THE EVENT IAS-19

Dear Colleagues and Friends,

it is my pleasure to invite you to join the 19th edition of the International Conference on Intelligent Autonomous Systems (IAS-19), which will be held in Genoa, Italy, from June 30th to July 4th, 2025.

IAS has been a focused and stimulating venue from 1985. In a historical moment in which research and innovation in artificial intelligence and robotics has reached one of its maximum peaks to date, we want to bring together world's top researchers, students, professionals, associations, and companies to share ideas, show recent innovations, and discuss together how to address timely and urgent challenges.

This edition's motto, "Ethical, responsible and inclusive robotics" lays the ground to support a thorough discussion about how to make recent advancements in artificial intelligence and robotics fair, well-designed, and for the benefit of all. We strongly believe that such a vision cannot be attained by a somewhat limited and generic idea about "technology transfer" from academia to industry, but via a reasoned interplay of use cases, technologies, ideas, business models and real market and societal needs.

**That's why we decided to blend as much as possible scientific tracks and industry experience.**

A few highlights:

- On **June 30th**, beside the usual workshops and tutorials, a crash course on entrepreneurship in artificial intelligence and robotics will be organized, which will be targeted to a wide audience of students and young (and less young!) researchers willing to better understand the latest ideas in the dialogues between Academia and the Industry.

- From **July 1st to July 4th**, during the three parallel scientific tracks, and apart from the exhibit space, selected exhibitors will have to opportunity to pitch in front of students and researchers to showcase their latest innovations and ideas.

- On **July 4th** we will an industry forum, organized as an open innovation event, where we will try to guide the discussion to form one or more supply chains, from needs to possible solutions, and back, involving students, professionals, and the companies.

Genoa is a fantastic city, a gateway to Europe made up of a vibrant industrial environment, wonderful landscape, and the willingness to innovate at its core.

Join us to be part of it and start collaborating with its research and industrial environment!

# LOCATION

## ALBERGO DEI POVERI

IAS19 will be held in Genoa at **Albergo dei Poveri**, historic building founded in the late 17th century by the Genoese patrician Emanuele Brignole as a charitable institution. Enriched over time with artworks and noble donations, it was transformed during the Napoleonic era.

In the 20th century, it served as a hospital before being granted to the University of Genoa in 1991. Renovated for educational use, it now hosts over 4,000 students from the faculties of Law and Political Science.
